Client experimental GoDriveCarBox

Cod sursa sistem achizitie si analiza

GDCB Explorer

Proiect	GoDrive
Beneficiar	GODRIVE SRL
Contract	Nr. 2/25.11.2016
Data modificare	2017.05.29
Data creere	2017.02.02
Versiune	1.2.2.1
Descriere	Implementare modele predictie defecte autovehicule

Introducere

Prezentul document descrie motorul de achizitie si management al datelor aferente proiectului GoDrive CarBox. Intreaga structura de date, cod sursa, fisiere de configurare se poate regasi in format GIT la adresa:

https://github.com/orgs/GoDriveCarBox/dashboard

In urmatoarele capitole sunt prezentate urmatoarele livrabile disponibile in repository-ul GIT mentionat anterior:

1. Structura si configurarea sistemului prin utilizarea fisierelor text JSON
2. Structura si definitia datelor pentru relationarea cu clientii GoDrive CarBox
3. Structura, definitia si exemple de date telemetrice generate
4. Codul sursa al modulului server Python (GDCB Explorer)
5. Codul sursa al modulului de machine learning in versiunea sa 2 (fata de livrabilul anterior 2.1) realizat in limbaj C++ portabil si utilizand bibliotecile de calcul numeric paralel Eigen.

Structura Datelor

Structura configurarii sistemului

Intregul sistem este configurabil prin modificarea fisierelor de tip text JSON care contine absolut toate informatiile necesare si suficiente in vederea configurarii complete a sistemului GDCB Explorer. Mai jos sunt prezentate fisierele text standard de configurare a experimentul la data pregatirii acestui document livrabil:
